Subject: Chemical Lime --- Grantsville Quarry M/045/028

We received a copy of a mine plan recently submitted to SITLA from Chemical Lime - Grantsville Quarry. At that time I contacted Dana in the home office of Chemical Lime for more information. She stated that she would file a plan with us with the additional information.

Today I called to see how the submission was coming. She said that the plan was on hold because they had found that SITLA only owned the mineral rights in that area, someone else owned the surface. They had not received permission from the land owner to mine yet. Because of the nature of the negotiations, she felt that the plan would probably change. Therefore the plan we presently had in our possession would not be valid.

We should pull that submission from our review file and send it to the files.
